

CAPITOL TECH
21st CENTURY LEARNING

The Georgia Department of Education
in partnership with
Pioneer RESA
Educational Technology Center
cordially invites you to attend
Capitol Tech Day
Tuesday, March 9, 2010
10:00 a.m. to 2:00 p.m.
South Rotunda
Georgia State Capitol

Capitol Tech, a collaborative effort between Georgia's schools and the state's Educational Technology Centers, features Georgia's students demonstrating the application of 21st century skills in the educational process.

Capitol Tech will spotlight Georgia's students using the fundamental technology tools necessary to succeed in the 21st century. Students and teachers are eager for their local legislators to see how these tools are helping to increase student achievement and build community partnerships.

The Da Vinci Academy in Hall County

will be sharing their educational projects
demonstrating the importance of the application of
technology to the learning process.

Students will showcase multimedia projects demonstrating an understanding of curricular areas in which students collaborate with teachers to produce lessons that effectively infuse technology into learning and the classroom.

This important annual event demonstrates the possibilities technology provides for Georgia's teachers, students, and communities, and we invite your attendance.
